Abby Middle is a BRING YOUR OWN LAPTOP School!

Dear Parents & Guardians:

As we look forward to next year, we are excited that Abbotsford Middle School is a Bring Your Own Laptop (BYOL) school. A BYOL program allows opportunities to learn digital communication and citizenship skills within a structured and supervised setting. Students will also use online resources and digital tools to add to their already world-class Middle Years Program education at Abbotsford Middle. Using laptops as a tool, students are given access to assistive technologies and a wide variety of ways to digitally demonstrate their learning. All the while, students develop 21st century skills that include collaborating, creativity, and problem solving.

There is no specific laptop needed. We simply ask for a laptop that can hold a charge for at least 3 hours and has internet capability. No specific software is required as most applications are available online. Before purchasing any device, we recommend you consider all purchasing options. The Abbotsford School District will continue with the Microsoft platform next year. Chromebooks will continue to work with this change.

Each class has a small number of school district provided laptops available for use during class time. The purpose is to accommodate students that need to borrow a laptop during the day when their personal laptop might not be available, or to accommodate students who are unable to provide a laptop.

If you have any questions regarding the program, please contact Ms. Lauren Mactavish, Library Learning Commons Teacher at lauren.mactavish@abbyschools.ca, or Mr. Dennis Tjernagel, Principal, at dennis.tjernagel@abbyschools.ca.

Sincerely,

Ms. Lauren Mactavish
Library Learning Commons Teacher

Mr. Dennis Tjernagel
Principal
